

Supplemental Table S3. The Sensitivity, Specificity, PPVs, and NPVs of HbA1c for Diagnosis of Prediabetes Stratified by Waist Circumference (OGTT Was Considered as the Gold Standard)

	Number	Sensitivity, %	Specificity, %	PPV	NPV
All	7,512	55.9	68.3	31.7	85.4
Normal	5,401	49.4	71.9	29.8	85.5
Obese	2,105	69.1	58.4	35.1	85.3

Obese, waist circumference >90 cm (men) or >85 cm (women).

PPV, positive predictive value; NPV, negative predictive value; HbA1c, glycated hemoglobin; OGTT, oral glucose tolerance test.
