Erratum: Correction of Figures

Association between the *Blautia/Bacteroides* Ratio and Altered Body Mass Index after Bariatric Surgery

https://doi.org/10.3803/EnM.2022.1481

In the published article, Fig. 2C appeared incorrectly. The “r=0.65” should be changed to “r=–0.65.” And Fig. 5C also appeared incorrectly. The “r=0.59” should be changed to “r=–0.59.” In addition, Supplemental Fig. S1B and S1C appeared incorrectly. The “Before” and “After” should be switched.

The corrected figures are shown below.

![Corrected Figure 2](image-url)

**Fig. 2.** Prominent gut microbiota at the genus level before and after bariatric surgery and correlation with body mass index (BMI). (A) Linear discriminant analysis (LDA) effect size before and after bariatric surgery (threshold 2.4). (B) Correlation between *Blautia* and BMI. (C) Correlation between *Bacteroides* and BMI. (D) Correlation between the log value of *Blautia/Bacteroides* and BMI.

Supplemental Fig. S1. Prominent gut microbiota at the species level before and after bariatric surgery and correlation with body mass index (BMI). (A) Linear discriminant analysis (LDA) effect size before and after bariatric surgery (threshold 3.6). (B) Correlation between Ruminococcus gravisus and Blautia obeum wexlerae and BMI. (C) Correlation between Bacteroides dorei vulgatus, Bacteroides uniformis, Bacteroides nordii and Bacteroides thetaiotaomicron and BMI.
